All children require early **ACCESS TO LANGUAGE** to reach their full potential.

The brain has no preference for language input — **SIGNED OR SPOKEN**.

Sign language is the most **ACCESSIBLE PATHWAY** to a language foundation for deaf children.

With early access to language, children can **THRIVE** in social settings, the classroom, and future careers.

**ONLY 2% OF THE 32 MILLION** deaf children in the world receive education in sign language.

Let’s **MAKE LEARNING ACCESSIBLE** for all children.
